

NOTICE: Claim Submission of Postpartum Visit

March 31, 2023

Dear provider,

BCBSAZ Health Choice understands the importance of the postpartum visit to identify postpartum depression, stress, anxiety, substance use, and medical morbidities which impact postpartum health.

Please submit a claim when your patients attend their postpartum visit.

The maternal team at BCBSAZ Health Choice provides outreach to our postpartum members. We offer assistance with scheduling their postpartum visit, transportation, and education on the importance of keeping their postpartum visit to ensure their physical, emotional, and family planning needs are met.

Your submission of a postpartum claim facilitates identifying members who have attended their postpartum visit. The maternal team will implement additional outreach interventions for members who have not attended their postpartum visit.

Our goal is to decrease Serious Maternal Morbidities by promoting postpartum access to care and improving healthy maternal outcomes.
