**LABCORP DIAGNOSTIC ASSISTANT™**

Simplify patient care with Diagnostic Assistant

Easy access to all patient results in one place, reduced need for phone calls and seamless integration with your hospital electronic health record (EHR)—Epic or Cerner
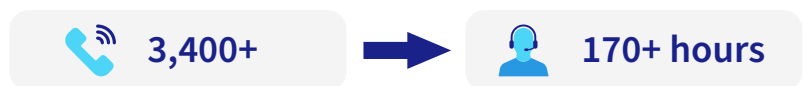

Our new application streamlines patient care by providing all of a patient's results in one convenient place. Eliminate the hassle of searching through multiple systems and the frustration of making countless phone calls. Diagnostic Assistant makes it easy for healthcare professionals to access all of the information they need, saving time and allowing them to focus on what matters most—patient care.

Bring Labcorp results from outside of your network directly into your hospital EHR

With Diagnostic Assistant, a South Carolina hospital network streamlined thousands of patient results:

18K+ Accounts outside of the SC hospital network order Labcorp tests for patients

>90% Of the lab results are non-Epic/non-Cerner accounts

215K Patients have tests performed outside of the SC hospital network

56% Of patients receive care from multiple accounts within the SC hospital network

Reduce the need to call Labcorp to request faxed lab results/reports

3,400+ → **170+ hours**

Fax requests to Labcorp across the SC hospital network in 2022

Spent with Labcorp call center, requesting faxed lab reports

Labcorp Diagnostic Assistant has contributed to an **80% reduction** in fax report/result requests to the call center

Leverage Diagnostic Assistant across the hospital

Emergency room

ER staff review lab results ordered by primary care physician/specialist at the time of patient ER submission

Delivery center

OB-Gyn has access to lab results performed in community setting during delivery in the hospital

Hospital pharmacy

Pharmacist monitors labs performed by home health/ PCP while patient continues treatment after discharge

Pre-admission testing (PAT)

PAT nurse reviews labs performed by PCP prior to the patient's scheduled surgery

Simplify patient care with Diagnostic Assistant

Never have to leave the hospital EHR to access this information

Labcorp Diagnostic Assistant seamlessly integrates with Epic and can be accessed directly from the patient's medical record.

## View all Labcorp results directly in your hospital EHR

1. Diagnostic Assistant launches with combined hospital EHR and Labcorp lab results

A Change from Panel View to Clinical View

B Apply Quick Filters to easily view results that are bookmarked, new, only added by Labcorp and/or abnormal

C Build your own custom filters

D Search for lab results by name, date, ordering provider, performing lab, etc.

E View lab results for both Labcorp and Epic

F View PDFs that aren't able to be delivered through the EHR interface

G Expand a lab result for more detailed information

2. SmartTrends™ visualizes hospital EHR and Labcorp lab results combined

A Filter lab tests based on specific conditions

B Trend lab results on a single line, regardless of performing lab or ordering provider

C View lab results from both Labcorp and Epic

D Integrated labs, vitals, medications and other clinical data in a single view across a timeline
