

**New ACOG/SMFM guidance:** cell-free DNA screening is suitable for all pregnancies regardless of age or risk, including twins, and should be combined with diagnostic testing and genetic counseling services<sup>1</sup>

### ACOG/SMFM New Practice Bulletin #226:<sup>1</sup>

- Supports use of NIPT for all pregnant women, regardless of age or risk, and can be used for twins
- NIPT is the most sensitive and specific screen for common aneuploidies, supported by both diagnostic testing and genetic counseling
- Screening and diagnostic testing options should be discussed and offered to all patients
- All patients should be offered genetic counseling

### How LabCorp/Integrated Genetics supports the guidelines:

**MANY testing companies** offer a simple cfDNA (NIPT) test.

**SOME testing companies** also provide one or more additional testing options or services.

**BUT LabCorp/Integrated Genetics** offers a best-in-class NIPT test AS WELL AS additional screening and diagnostic testing options AND genetic counseling services for both patients and providers.

### Let our experience support the needs of your practice and your patients:

- Pioneering **MaterniT 21 PLUS** cfDNA test, proven experience with over 1.5 million tests performed to-date, and published data on over 30,000 twins and multiples<sup>2</sup>

**MaterniT<sup>®</sup> 21 PLUS** | A low 0.9% non-reportable rate overall, 2.08% on patients drawn at 9 weeks gestation, 2.4% in patients that weigh 200-225 lb, rapid/accurate results in 3-5 days\*, and genome-wide follow-up<sup>2</sup>

\*from collection of specimen

- Comprehensive diagnostic portfolio including **Reveal<sup>®</sup> SNP microarray, with over 75,000 samples tested<sup>2</sup>**
- Extensive maternal serum screening options, including **MS-AFP<sup>2</sup>**
- Over **130 genetic counselors on staff**, to support both patients and providers<sup>2</sup>

**Screening is one thing, providing screening with extensive diagnostic and counseling support is quite another.**
